WORK EXPERIENCE

System Engineer

03/2022 – 11/2025

Tata Consultancy Service

Chennai, India

- Led L2 infrastructure and systems administration support for 1000+ enterprise users across Windows and Linux environments, ensuring system availability, stability, and operational efficiency.
- Monitored network and security activity across diverse IT systems (Windows/Linux/macOS endpoints, cloud, firewalls, IDS/IPS) in a multi-functional SOC environment. Escalated suspicious activity promptly.
- Automated tasks using PowerShell scripting & Bash and utilized ServiceNow for SLA compliance.
- Conducted log analysis, threat hunting and digital forensics to proactively identify and respond to threats.
- Developed new log correlation rules and dashboards to enhance threat detection capabilities.
- Log analysis using Splunk, ELK Stack, and Kibana to proactively identify operational and security issues.
- Performed routine vulnerability scans (Nessus, Clone Systems) and ensured compliance adherence.
- Performed endpoint administration and patch management (Endpoint Central), technical support and access management (Windows Server 2016 and AD, OKTA).
- Investigated phishing/spam emails for security incidents.
- Managed and monitored network, server & security alerts via SolarWinds & SentinelOne.

PROJECT

Enterprise SOC/NOC Lab – Proxmox Environment

03/2026 – 05/2026

- Designed and deployed a multi-tier virtual infrastructure using Proxmox, Docker, and Kubernetes, simulating enterprise SOC/NOC environments
- Implemented Active Directory domain services for centralized identity management, authentication, and access control workflows
- Configured and integrated Wazuh SIEM and Zabbix for security monitoring, log analysis, alerting, and network performance tracking
- Deployed and managed TrueNAS, pfSense, and Pi-hole for storage solutions, network segmentation, firewall security, and DNS filtering
- Configured and simulated enterprise networking using HP switches and Cisco routers, including VLAN setup and routing architecture

EDUCATION

Post Graduate Diploma in Applied Network Infrastructure & System Administration

01/2024 - 05/2025

Conestoga College

Kitchener, Canada

Notable Courses: Windows Server, Linux Server, Cloud Computing and Security

Bachelor of Engineering, Electronics and Communication

06/2017 - 07/2021

KCG College of Technology

Chennai, India

Notable Courses: Computer Networking, Cloud Security

CERTIFICATIONS

CompTIA Security+

05/2026

CompTIA Network+

02/2026

AWS Certified Cloud Practitioner

08/2025

TECHNICAL SKILLS

Programming & Scripting: Python, PowerShell, SQL, Bash.

SIEM & EDR/XDR: Splunk, Wazuh, Elastic, Defender 365, SentinelOne

Network Tools: NGFW, Cloudflare WAF, DLP, Firewall,

Security Tools: MISP, Burp Suite, Nessus, Nmap, Wireshark,

Cloud & DevSecOps: AWS, Azure, GCP/Google Workspace, Docker, Kubernetes, Git, VMWare, VirtualBox

Compliance & IAM: Okta, Entra ID, Azure AD, CIS Controls, ISO 27001, NIST, PCI-DSS, HIPAA, GDPR

ITSM Tools: ServiceNow (ITIL), Jira, Zendesk, SLA Management, Microsoft 365.

Operating Systems: Windows 10/11, Windows Server 2016/2019, Linux (Ubuntu, Rocky Linux)
